

ICDF2C and Seoul Tech Society Essay Contest

Have you ever surfed the Dark Web? Are you worried about the security of your virtual property? Technology is changing, and for every good side, there is a dark side. With these new technologies, how can the public protect themselves? Should the public rely on their government, or take security into their own hands? Let us know what you think with the ICDF2C and Seoul Tech Society Cyber Crime Essay Contest.

This year ICDF2C has two focus areas:

- Usage, implications and investigation of the “Dark Web”
- Preventing or investigating crimes using cryptocurrencies

Although these topics are recommended, essays are not limited to these topics. For the full list of conference topics, please see <http://d-forensics.org/2015/show/cf-papers>

Submission Instructions

- Submissions should be in English
- Submissions should be **no longer** than 3 pages (with references)
- Submissions must be submitted as a PDF
